## Energy Efficiency for Existing Buildings

*Please print legibly or type*

Project Address:		
Owner:	Phone Number:	Activity/Permit #:
Applicant:	Phone Number:	<input type="checkbox"/> Residential <input type="checkbox"/> Non-Residential

<p><b>15.45.060—Energy Efficiency for Existing Buildings</b></p> <p>Energy efficiency upgrades are required when a building permit is issued for any addition or alteration to non-residential buildings, or when a building permit is issued for any addition or alteration with a project valuation of \$65,000 or more to a residential building.</p> <p>In all cases of additions or alterations that trigger the requirement, compliance is required as follows:</p> <ol style="list-style-type: none"> <li>1. Applicants will dedicate an additional amount of 10% of project valuation toward energy upgrades, up to a maximum of \$20,000 beyond the original permit valuation for the addition or alteration.</li> <li>2. Energy upgrades that can be counted toward meeting this requirement include those that are part of the original addition or alteration that exceed local and state requirements, and those that are beyond the original scope of the project that meet or exceed local and state requirements.</li> <li>3. The Building Official will have the flexibility to determine substantial compliance with this Section in cases where practical difficulties make it infeasible to meet the requirements. A project proponent would need to demonstrate in writing that the requirements are financially infeasible, that they are infeasible within the project timeframe, that the products needed are not available, or that other practical difficulties exist.</li> </ol>	<p><b>Project Valuation</b></p> <p>\$ _____</p> <p>10% _____</p>
---	--

Energy Efficiency Feature Items <i>Provide description below</i>	Part of the original addition or alteration that exceed local and state requirements.	Beyond the original scope of the project that meet or exceed local and state requirements.	Additional cost associated with upgrade.
1. Glazing	_____	_____	\$ _____
2. HVAC	_____	_____	\$ _____
3. Ceiling/Wall Insulation	_____	_____	\$ _____
4. Lighting	_____	_____	\$ _____
5. Roofing	_____	_____	\$ _____
6. Other	_____	_____	\$ _____
Total cost of energy efficiency features provided			\$ _____
Total			\$ _____
