# Hanging Monkey Handprint

Supplies

- brown paint
- paintbrush
- scissors
- green paint
- googly eyes
- tan and green construction paper
- water bottle lid

Instructions

1. Paint half your palm and 4 fingers with brown paint. Don't paint your thumb.

2. Place your painted hand upside down on the white construction paper to make your print; your fingers should touch the vines. Paint a round body connected to the finger print impression.

3. Using green construction paper cut 3 vines and glue on the top of your white paper.

4. For the monkey face, use a water bottle lid to trace 2 brown circles, an 8 oz. cup to trace 1 brown circle and draw an oval on the tab paper smaller than the head. Cut out all the pieces.

5. Glue large circle to the side of the monkey handprint; add oval face. Glue 2 smaller brown circles for ears and tan circles for inside of the ears. Add googly eyes, a nose and mouth.
